Monroe Capital Corporation BDC Announces First Quarter 2023 Results

CHICAGO, IL, May 10, 2023 -- Monroe Capital Corporation (Nasdaq: MRCC) ("Monroe") today announced its financial results for the first quarter ended March 31, 2023.

Except where the context suggests otherwise, the terms "Monroe," "we," "us," "our," and "Company" refer to Monroe Capital Corporation.

First Quarter 2023 Financial Highlights

- Net Investment Income of \$6.6 million, or \$0.31 per share
- Adjusted Net Investment Income (a non-GAAP measure described below) of \$6.9 million, or \$0.32 per share
- Net increase in net assets resulting from operations of \$3.4 million, or \$0.16 per share
- Net Asset Value ("NAV") of \$223.0 million, or \$10.29 per share
- Paid quarterly dividend of \$0.25 per share on March 31, 2023
- Current annual cash dividend yield to shareholders of approximately 13.8%⁽¹⁾

Chief Executive Officer Theodore L. Koenig commented, "We are pleased to report a strong start to 2023 with Adjusted Net Investment Income of \$0.32 per share in the first quarter. We believe that tighter credit conditions and the recent banking disruptions present a unique opportunity for us to capitalize on the current market environment, where deal terms, pricing and structures are more favorable. Our ability to provide certainty of execution and flexible capital solutions to leading growth orientated middle market companies allows us to redeploy capital into attractive investment opportunities. As always, we continue to be focused on maintaining portfolio credit quality while maximizing Adjusted Net Investment Income and generating strong risk-adjusted returns for our shareholders."

Monroe Capital Corporation is a business development company affiliate of the award winning private credit investment firm and lender, Monroe Capital LLC.

⁽¹⁾ Based on an annualized dividend and closing share price as of May 9, 2023.

Management Commentary

Adjusted Net Investment Income totaled \$6.9 million or \$0.32 per share for the quarter ended March 31, 2023. This compares with \$5.6 million or \$0.26 per share for the quarter ended December 31, 2022. This increase in Adjusted Net Investment Income is primarily the result of increases in effective rates on the portfolio from the rising interest rate environment. See Non-GAAP Financial Measure – Adjusted Net Investment Income discussion below.

NAV decreased by \$0.10 per share, or 1.0%, to \$223.0 million or \$10.29 per share as of March 31, 2023, compared to \$225.0 million or \$10.39 per share as of December 31, 2022. The NAV decrease of \$0.10 per share was primarily the result of net unrealized losses on the portfolio that were primarily attributable to a couple specific portfolio companies that saw declining financial performance resulting from larger economic factors, including the rising interest rate environment and inflationary impacts on consumer spending.

MRCC's debt-to-equity leverage remained unchanged from December 31, 2022 at 1.49 times debt-to equity. We continue to focus on managing our investment portfolio and selectively redeploying capital resulting from repayments.

(2) See *Non-GAAP Financial Measure – Adjusted Net Investment Income* below for a detailed description of this non-GAAP measure and a reconciliation from net investment income to Adjusted Net Investment Income. The Company uses this non-GAAP financial measure internally in analyzing financial results and believes that this non-GAAP financial measure is useful to investors as an additional tool to evaluate ongoing results and trends for the Company.

Portfolio Review

The Company had debt and equity investments in 102 portfolio companies, with a total fair value of \$532.1 million as of March 31, 2023, as compared to debt and equity investments in 105 portfolio companies, with a total fair value of \$541.0 million, as of December 31, 2022. The Company's portfolio consists primarily of first lien loans, representing 83.7% of the portfolio as of March 31, 2023, and 84.0% of the portfolio as of December 31, 2022. As of March 31, 2023, the weighted average contractual and effective yield on the Company's debt and preferred equity investments was 11.5% and 11.6%, respectively, as compared to the weighted average contractual and effective yield of 11.0% and 11.0%, respectively, as of December 31, 2022. Portfolio yield is calculated only on the portion of the portfolio that has a contractual coupon and therefore does not account for dividends on equity investments (other than preferred equity). As of March 31, 2023, 0.4% of the Company's total investments at fair value were on non-accrual as compared to 0.5% as of December 31, 2022.

Financial Review

Net Investment Income for the quarter ended March 31, 2023 totaled \$6.6 million, or \$0.31 per share, compared to \$5.5 million, or \$0.25 per share, for the quarter ended December 31, 2022. Adjusted Net Investment Income was \$6.9 million, or \$0.32 per share, for the quarter ended March 31, 2023, compared to \$5.6 million, or \$0.26 per share, for the quarter ended December 31, 2022. Investment income for the quarter ended March 31, 2023 totaled \$16.8 million, compared to \$15.2 million for the quarter ended December 31, 2022. The \$1.6 million increase in investment income was primarily as a result of an increase in portfolio yield. Total expenses for the quarter ended March 31, 2023 totaled \$10.2 million, compared to \$9.6 million for the quarter ended December 31, 2022. The \$0.6 million increase in expenses during the quarter was primarily driven by an increase in interest and other debt financing expenses resulting from the rising interest rate environment and an increase in incentive fees associated with the increase in net investment income.

Net gain (loss) was (\$3.3) million for the quarter ended March 31, 2023, compared to (\$1.0) million for the quarter ended December 31, 2022. Net realized and unrealized gains (losses) on investments were (\$3.5) million for the quarter. The net losses during the quarter were primarily attributable to fundamental performance of a couple specific portfolio companies. Other net gains (losses) totaled \$0.2 million for the quarter ended March 31, 2023, comprised primarily of net unrealized gains on foreign currency forward contracts used to hedge currency exposure on investments denominated in foreign currency.

Net increase (decrease) in net assets resulting from operations was \$3.4 million, or \$0.16 per share, for the quarter ended March 31, 2023, compared to \$4.5 million, or \$0.21, for the quarter ended December 31, 2022.

Liquidity and Capital Resources

At March 31, 2023, the Company had \$6.9 million in cash, \$202.8 million of debt outstanding on its revolving credit facility and \$130.0 million of debt outstanding on its 2026 Notes. As of March 31, 2023, the Company had approximately \$52.2 million available for additional borrowings on its revolving credit facility, subject to borrowing base availability.

MRCC Senior Loan Fund

SLF is a joint venture with Life Insurance Company of the Southwest (“LSW”), an affiliate of National Life Insurance Company. SLF invests primarily in senior secured loans to middle market companies in the United States. The Company and LSW have each committed \$50.0 million of capital to the joint venture. As of March 31, 2023, the Company had made net capital contributions of \$42.7 million in SLF with a fair value of \$35.8 million, as compared to net capital contributions of \$42.7 million in SLF with a fair value of \$35.5 million at December 31, 2022. During the quarter ended March 31, 2023, the Company received an income distribution from SLF of \$0.9 million, consistent with the \$0.9 million received during the quarter ended December 31, 2022. The SLF’s underlying investments are loans to middle-market borrowers that are generally larger than the rest of MRCC’s portfolio which is focused on lower middle-market companies. The SLF’s portfolio was valued at 93.5% of amortized cost at March 31, 2023, consistent with December 31, 2022.

As of March 31, 2023, SLF had total assets of \$187.0 million (including investments at fair value of \$178.2 million), total liabilities of \$115.5 million (including borrowings under the \$175.0 million secured revolving credit facility with Capital One, N.A. (the “SLF Credit Facility”) of \$115.7 million) and total members’ capital of \$71.5 million. As of December 31, 2022, SLF had total assets of \$192.8 million (including investments at fair value of \$183.2 million), total liabilities of \$121.8 million (including borrowings under the SLF Credit Facility of \$122.2 million) and total members’ capital of \$71.0 million.

Non-GAAP Financial Measure – Adjusted Net Investment Income

On a supplemental basis, the Company discloses Adjusted Net Investment Income (including on a per share basis) which is a financial measure that is calculated and presented on a basis of methodology other than in accordance with generally accepted accounting principles of the United States of America (“non-GAAP”). Adjusted Net Investment Income represents net investment income, excluding the net capital gains incentive fee and income taxes. The Company uses this non-GAAP financial measure internally in analyzing financial results and believes that this non-GAAP financial measure is useful to investors as an additional tool to evaluate ongoing results and trends for the Company. The management agreement with the Company’s advisor provides that a capital gains incentive fee is determined and paid annually with respect to realized capital gains (but not unrealized capital gains) to the extent such realized capital gains exceed realized and unrealized capital losses for such year. Management believes that Adjusted Net Investment Income is a useful indicator of operations exclusive of any net capital gains incentive fee as net investment income does not include gains associated with the capital gains incentive fee.

The following table provides a reconciliation from net investment income (the most comparable GAAP measure) to Adjusted Net Investment Income for the periods presented:

	For the quarter ended			
	March 31, 2023		December 31, 2022	
	Amount	Per Share Amount	Amount	Per Share Amount
	(in thousands, except per share data)			
Net investment income	\$ 6,627	\$ 0.31	\$ 5,520	\$ 0.25
Net capital gains incentive fee	-	-	-	-
Income taxes, including excise taxes	233	0.01	116	0.01
Adjusted Net Investment Income	<u>\$ 6,860</u>	<u>\$ 0.32</u>	<u>\$ 5,636</u>	<u>\$ 0.26</u>

Adjusted Net Investment Income may not be comparable to similar measures presented by other companies, as it is a non-GAAP financial measure that is not based on a comprehensive set of accounting rules or principles and therefore may be defined differently by other companies. In addition, Adjusted Net Investment Income should be considered in addition to, not as a substitute for, or superior to, financial measures determined in accordance with GAAP.
