Monroe Capital Corporation BDC Announces Fourth Quarter and Full Year 2023 Results

CHICAGO, IL, March 11, 2024 – Monroe Capital Corporation (Nasdaq: MRCC) (“Monroe”) today announced its financial results for the fourth quarter and full year ended December 31, 2023.

Except where the context suggests otherwise, the terms “Monroe,” “we,” “us,” “our,” and “Company” refer to Monroe Capital Corporation.

Fourth Quarter 2023 Financial Highlights

- Net Investment Income of \$5.3 million, or \$0.24 per share
- Adjusted Net Investment Income (a non-GAAP measure described below) of \$5.6 million, or \$0.26 per share
- Net increase in net assets resulting from operations of \$1.6 million, or \$0.07 per share
- Net Asset Value (“NAV”) of \$203.7 million, or \$9.40 per share
- Paid quarterly dividend of \$0.25 per share on December 29, 2023
- Current annual cash dividend yield to shareholders of approximately 13.4% ⁽¹⁾

Full Year 2023 Financial Highlights

- Net Investment Income of \$23.2 million, or \$1.07 per share
- Adjusted Net Investment Income (a non-GAAP measure described below) of \$24.1 million, or \$1.11 per share
- Net increase in net assets resulting from operations of \$0.4 million, or \$0.02 per share

Chief Executive Officer Theodore L. Koenig commented, “We are pleased to report that our Adjusted Net Investment Income covered our dividend for the 15th consecutive quarter. As we look ahead in 2024, our focus continues to be on portfolio credit quality while capitalizing on the current market dynamics in order to generate strong risk-adjusted returns for our stockholders.”

Monroe Capital Corporation is a business development company affiliate of the award-winning private credit investment firm and lender, Monroe Capital LLC.

⁽¹⁾ Based on an annualized dividend and closing share price as of March 8, 2024.

Management Commentary

Adjusted Net Investment Income totaled \$5.6 million or \$0.26 per share for the quarter ended December 31, 2023. This compares with \$5.5 million or \$0.25 per share for the quarter ended September 30, 2023. The slight increase in Adjusted Net Investment Income during the quarter is driven by a combination of factors, including a comparatively smaller reversal of previously accrued fee income and reductions in interest expense as a result of lower leverage during the quarter. These increases were partially offset by a decrease in interest income as a result of a decrease in average invested assets. See Non-GAAP Financial Measure – Adjusted Net Investment Income discussion below.

NAV decreased by \$0.18 per share, or 1.9%, to \$203.7 million or \$9.40 per share as of December 31, 2023, compared to \$207.6 million or \$9.58 per share as of September 30, 2023. The decrease in NAV this quarter was primarily the result of net unrealized losses on the portfolio attributable to a few specific legacy portfolio companies that continued to be affected by macroeconomic and idiosyncratic challenges which impacted financial performance.

During the quarter, MRCC's debt-to-equity leverage decreased from 1.60 times debt-to-equity to 1.49 times debt-to-equity. The decrease in leverage was primarily driven by an increase in proceeds from sales and paydowns received during the quarter which were used to paydown the revolving credit facility. We continue to focus on managing our investment portfolio and selectively redeploying capital resulting from repayments.

⁽²⁾ See *Non-GAAP Financial Measure – Adjusted Net Investment Income* below for a detailed description of this non-GAAP measure and a reconciliation from net investment income to Adjusted Net Investment Income. The Company uses this non-GAAP financial measure internally in analyzing financial results and believes that this non-GAAP financial measure is useful to investors as an additional tool to evaluate ongoing results and trends for the Company.

Portfolio Review

The Company had debt and equity investments in 96 portfolio companies, with a total fair value of \$488.4 million as of December 31, 2023, as compared to debt and equity investments in 99 portfolio companies, with a total fair value of \$518.3 million, as of September 30, 2023. The Company's portfolio consists primarily of first lien loans, representing 82.4% of the portfolio as of December 31, 2023, and 82.9% of the portfolio as of September 30, 2023. As of December 31, 2023, the weighted average contractual and effective yield on the Company's debt and preferred equity investments was 12.1% and 12.1%, respectively, as compared to the weighted average contractual and effective yield of 12.4% and 12.5%, respectively, as of September 30, 2023. Portfolio yield is calculated only on the portion of the portfolio that has a contractual coupon and therefore does not account for dividends on equity investments (other than preferred equity). As of December 31, 2023, 1.5% of the Company's total investments at fair value were on non-accrual as compared to 1.2% as of September 30, 2023.

Financial Review

Results of Operations: Fourth Quarter 2023

Net investment income for the quarter ended December 31, 2023 totaled \$5.3 million, or \$0.24 per share, compared to \$5.4 million, or \$0.25 per share, for the quarter ended September 30, 2023. Adjusted Net Investment Income was \$5.6 million, or \$0.26 per share, for the quarter ended December 31, 2023, compared to \$5.5 million, or \$0.25 per share, for the quarter ended September 30, 2023. Investment income for the quarter ended December 31, 2023 totaled \$15.5 million, compared to \$15.6 million for the quarter ended September 30, 2023. Both quarters included an impact for the reversal of previously accrued fee income associated with the Company's former loan investment in IT Global Holdings, LLC ("IT Global"), \$0.5 million for the quarter ended December 31, 2023 and \$1.1 million for the quarter ended September 30, 2023. The Company has no remaining fee income accrued associated with IT Global. Excluding the impact of these fee income reversals, investment income decreased by \$0.7 million, primarily as a result of the decrease in the size of the Company's average investment portfolio during the quarter. Total expenses for the quarter ended December 31, 2023 totaled \$10.2 million, consistent with \$10.2 million for the quarter ended September 30, 2023. A decline in interest and other debt financing expenses driven by a reduction in the Company's average leverage level was offset by an increase in income taxes, including excise taxes, primarily associated with blocker entities that hold certain of the Company's equity investments.

Net gain (loss) was (\$3.7) million for the quarter ended December 31, 2023, compared to (\$5.7) million for the quarter ended September 30, 2023. This net loss for the quarter ended December 31, 2023 was primarily attributable to unrealized mark-to-market losses of a few specific legacy portfolio companies.

Net increase (decrease) in net assets resulting from operations was \$1.6 million, or \$0.07 per share, for the quarter ended December 31, 2023, compared to (\$0.2) million, or (\$0.01) per share, for the quarter ended September 30, 2023.

Results of Operations: Full Year 2023

Net investment income for the year ended December 31, 2023 totaled \$23.2 million, or \$1.07 per share, compared to \$22.2 million, or \$1.02 per share, for the year ended December 31, 2022. Adjusted Net Investment Income was \$24.1 million, or \$1.11 per share, for the year ended December 31, 2023, compared to \$23.6 million, or \$1.09 per share, for the year ended December 31, 2022. Investment income for the year ended December 31, 2023 totaled \$64.3 million, compared to \$56.6 million for the year ended December 31, 2022. The increase in investment income compared to prior year was primarily the result of an increase interest income, partially offset by a decrease in fee income. Investment income for the year ended December 31, 2023 included the reversal of \$1.6 million of previously accrued fee income associated with the Company's former loan investment in IT Global and the year ended December 31, 2022 included the one-time benefit of \$2.0 million in previously unrecorded interest income associated with the repayment of the Company's former loan investment in Curion Holdings, LLC ("Curion"). Excluding these two non-recurring items, investment income increased \$11.3 million, primarily as a result of an increase in interest income due to the increases in effective rates on the portfolio from the rising interest rate environment. Total expenses, net of incentive fee and management fee waivers, for the year ended December 31, 2023 totaled \$41.0 million, compared to \$34.4 million for the year ended December 31, 2022. The \$6.6 million increase in expenses during the year was primarily driven by an increase in interest and other debt financing expenses, resulting from the rising interest rate environment, and an increase in incentive fees driven by stronger pre-incentive fee net investment income performance.

Net gain (loss) was (\$22.9) million for the year ended December 31, 2023, compared to (\$25.0) million for the year ended December 31, 2022. Net realized and unrealized gains (losses) on investments were (\$23.0) million for the year ended December 31, 2023. This net loss was primarily attributable to unrealized mark-to-market losses of a few specific legacy portfolio companies that continue to be affected by macroeconomic and idiosyncratic challenges and the Company's investment in MRCC Senior Loan Fund I, LLC ("SLF"). The decrease in value at the SLF was driven by net losses on the SLF's investments, which are loans to traditional upper middle-market borrowers.

Net increase (decrease) in net assets resulting from operations was \$0.4 million, or \$0.02 per share, for the year ended December 31, 2023, compared to (\$2.8) million, or (\$0.13) per share, for the year ended December 31, 2022.

Liquidity and Capital Resources

At December 31, 2023, the Company had \$5.0 million in cash and cash equivalents, \$174.1 million of debt outstanding on its revolving credit facility and \$130.0 million of debt outstanding on its 2026 Notes. As of December 31, 2023, the Company had approximately \$80.9 million available for additional borrowings on its revolving credit facility, subject to borrowing base availability.

MRCC Senior Loan Fund

SLF is a joint venture with Life Insurance Company of the Southwest ("LSW"), an affiliate of National Life Insurance Company. SLF invests primarily in senior secured loans to middle market companies in the United States. The Company and LSW have each committed \$50.0 million of capital to the joint venture. As of December 31, 2023, the Company had made net capital contributions of \$42.7 million in SLF with a fair value of \$33.1 million, as compared to net capital contributions of \$42.7 million in SLF with a fair value of \$33.3 million at September 30, 2023. During the quarter ended December 31, 2023, the Company received dividend income from SLF of \$0.9 million, consistent with the \$0.9 million received during the quarter ended September 30, 2023. SLF's underlying investments are loans to middle-market borrowers that are generally larger than the rest of MRCC's portfolio which is focused on lower middle-market companies. SLF's average mark on the underlying investment portfolio increased by 1.5% during the quarter, from 89.4% of amortized cost as of September 30, 2023, to 90.9% of amortized cost as of December 31, 2023, primarily as a result of the realization of a debt position during the quarter.

As of December 31, 2023, SLF had total assets of \$148.4 million (including investments at fair value of \$139.9 million), total liabilities of \$82.2 million (including borrowings under the \$110.0 million secured revolving credit facility with Capital One, N.A. (the "SLF Credit Facility") of \$82.0 million) and total members' capital of \$66.2 million. As of September 30, 2023, SLF had total assets of \$158.7 million (including investments at fair value of \$148.2 million), total liabilities of \$92.1 million (including borrowings under the SLF Credit Facility of \$92.1 million) and total members' capital of \$66.6 million.

Non-GAAP Financial Measure – Adjusted Net Investment Income

On a supplemental basis, the Company discloses Adjusted Net Investment Income (including on a per share basis) which is a financial measure that is calculated and presented on a basis of methodology other than in accordance with generally accepted accounting principles of the United States of America ("non-GAAP"). Adjusted Net Investment Income represents net investment income, excluding the net capital gains incentive fee and income taxes. The Company uses this non-GAAP financial measure internally in analyzing financial results and believes that this non-GAAP financial measure is useful to investors as an additional tool to evaluate ongoing results and trends for the Company. The management agreement with the Company's advisor provides that a capital gains incentive fee is determined and paid annually with respect to realized capital gains (but not unrealized capital gains) to the extent such realized capital gains exceed realized and unrealized capital losses for such year. Management believes that Adjusted Net Investment Income is a useful indicator of operations exclusive of any net capital gains incentive fee as net investment income does not include gains associated with the capital gains incentive fee.

The following tables provide a reconciliation from net investment income (the most comparable GAAP measure) to Adjusted Net Investment Income for the periods presented:

Adjusted Net Investment Income may not be comparable to similar measures presented by other companies, as it is a non-GAAP financial measure that is not based on a comprehensive set of accounting rules or principles and therefore may be defined differently by other companies. In addition, Adjusted Net Investment Income should be considered in addition to, not as a substitute for, or superior to, financial measures determined in accordance with GAAP.
